The screenshot shows the Anaconda Miniconda documentation page in a web browser. The browser's address bar displays 'docs.anaconda.com/miniconda/'. The page features a dark theme with a green Anaconda logo in the top left. A navigation sidebar on the left lists sections like 'Anaconda Documentation', 'Getting Started', 'Tools', and 'Business Solutions', with 'Miniconda' highlighted under 'Getting Started'. The main content area is titled 'Miniconda' and describes it as a free, miniature installation of Anaconda Distribution. It includes a paragraph about installing additional packages using the 'conda install' command. Below this, there are two green buttons with white text: 'Is Miniconda free for me?' and 'Should I install Miniconda or Anaconda Distribution?'. Further down, a section titled 'Latest Miniconda installer links' provides instructions for downloading the latest installers for Python 3.12. The first step, '1. Go to anaconda.com/download.', is highlighted with a red rectangular box. The right sidebar contains a search bar and a list of links for 'On this page', including 'Latest Miniconda installer links' and 'Quick command line install'.

Miniconda

Miniconda

Miniconda is a free, miniature installation of Anaconda Distribution that includes only conda, Python, the packages they both depend on, and a small number of other useful packages.

If you need more packages, use the `conda install` command to install from thousands of packages available by default in Anaconda's public repo, or from other channels, like conda-forge or bioconda.

[Should I install Miniconda or Anaconda Distribution?](#)

Latest Miniconda installer links

To download the latest Miniconda installers for Python 3.12:

1. Go to anaconda.com/download.
2. Submit your email to register with Anaconda, if desired.
3. Click **Submit** to continue to the Download Now page.
4. Scroll down past the Anaconda Distribution installers.

파이썬 설치 - 구글에서 '미니콘다 다운로드' 검색

The screenshot shows the Anaconda website's download page. The browser address bar displays 'anaconda.com/download/success'. The Anaconda logo and navigation links (Products, Solutions, Resources, Partners, Company) are at the top. A 'Sign Up' button is in the top right. The main heading 'Miniconda Installers' is highlighted with a red box. Below it, three columns represent different operating systems: Windows, Mac, and Linux. Each column lists 'Python 3.12' and provides download links for various installer types. The Windows column is also highlighted with a red box.

The screenshot shows the Jupyter Notebook interface. At the top, the browser address bar displays `localhost:8888/notebooks/Documents/work/test/Untitled2.ipynb`. Below it, the Jupyter logo and the text "Untitled2 Last Checkpoint: 2 minutes ago" are visible. A menu bar contains "File", "Edit", "View", "Run", "Kernel", "Settings", and "Help". Below the menu bar is a toolbar with icons for saving, adding a new cell, deleting a cell, copying, pasting, running a cell, interrupting the kernel, and refreshing. The "Code" dropdown menu is open, showing a list of cell types. A red square highlights the "Insert Cell Below" option in the dropdown menu. A red arrow points from this option to the text "또는 b" (or b) on the right. The notebook content area shows three code cells. The first cell is empty. The second cell contains the code `1+1` and the output `2`. The third cell is empty.

1000 rows × 7 columns

열 이름, 변수 명, 필드 명

The diagram illustrates a 2D array structure. It consists of a grid of 15 rows and 8 columns. The first row is shaded gray and is labeled "행(row)" on the left. The first column is shaded gray and is labeled "레코드, 관측치" (Record, Observation) on the left. The last row is also shaded gray and is labeled "레코드, 관측치" on the left. The last column is also shaded gray and is labeled "열(column)" on the right. The grid is composed of 15 rows and 8 columns of cells. The first row is shaded gray. The first column is shaded gray. The last row is shaded gray. The last column is shaded gray. The grid is composed of 15 rows and 8 columns of cells.
